

INTERHOUSE YOUNG SCIENTIST COMPETITION

“Science is about the miracle of the mundane....and children can appreciate this best. Every child is a scientist.”

K.R. Mangalam World school does not only put its heart and soul to rise the knowledge of its kids through its unique techniques of teaching but it also brings out the healthy spirit of competition in the kids by organizing wonderful creative events as well. Science is about asking your own questions and making your own investigations....two things young children are very good at. Keeping this in mind, an Inter House “YOUNG SCIENTIST” competition was organized where selected children from all the four houses – RUBY, EMERALD, SAPPHIRE and TOPAZ participated enthusiastically. The four houses had different themes based on different scientific theories on which the kids did their experiments i.e Topaz house –“Innovations in telephone”, Sapphire house –“The story of water”, Ruby house –“The Wonder of water world”, Emerald house-“Explore science with young scientist”. The children managed various materials used in their experiments with excellence and enjoyed doing it. Although all the houses participated actively, the first position was shared by **EMERALD HOUSE, TOPAZ HOUSE, RUBY HOUSE** followed by **SAPPHIRE HOUSE** who secured second position in the competition. The competition inspired the children to think, work and perform creatively. The competition develops a great feel of scientist in the young minds of the little ones .Overall it was a great learning experience for the children , which enhanced their knowledge and boost their confidence.
