# E-LEARNING

# ONLINE LEARNING

- The Coronavirus pandemic and the ensuing lockdown has forced schools and colleges across India to temporarily shut .
- This move had created a big gap in the education system .
- My school (K.R.Mangalam Faridabad) started to provide online classes to help students through zoom app to continue our education from the comfort of our homes.

# WHY ONLINE CLASSES ARE IMPORTANT?

- A major factor that frames student life is a set routine comprising school, homework, coaching or tuition classes, co-curricular activities.
- But this routine has completely been disrupted - the boundaries between study time, play time and me-time having merged these days.
- Establishing a routine becomes crucial for children, especially while staying indoors the entire day, to which they are not used to.

- 
- A routine will keep the child engaged and the discipline to follow that routine has to come from parents.
  - The online courses help to do just that.
  - The online environment offers unprecedented opportunities for people who would otherwise have limited access to education as well as a new paradigm for educators in which dynamic courses of the highest quality can be developed.

# ADVANTAGES OF E-LEARNING

- 1. Easily accessible: The e- learning method requires only an internet connection with good speed and a computer or mobile. While taking classes online, attending is as simple as opening up your computer or tablet unlike physical classes. The sessions can be even recorded for later use.
- 2. No commuting required: Since the students do not require to travel to a particular class for learning they can save the travelling time and use it for relaxing after the lessons.
- 3. More Individual attention: The teachers can also be at ease as they have enough options to interact with each student online, instruct and address specific issues even directly after the class.

# ADVANTAGES OF E-LEARNING

- 4. Social distancing can be exercised: Amidst the regulations of social distancing and self isolation, the students if allowed to attend schools may not be able to exercise the safety precautions in an effective manner. It would be very tough to control the students from playing or touching each other which might make the situation of virus spread out of control. Online classes can provide the same quality of education in the comfort of their homes
- 5. Convenient to fit into the day: Students can fit online classes around their existing responsibilities and commitments and can learn at his or her own pace and time thereby planning study time.

# E LEARNING PLATFORMS

- A E-Learning Platform is an integrated set of interactive online services that provides the teachers, learners, parents and others involved in education with information, tools and resources to **support and enhance educational delivery and management.**

# BYJUS

- **BYJU'S:** BYJU'S has emerged as the leader of the digital education sector in India. Founded back in 2011 with the aim to assemble a team of able educators for the online platform.
- IT offers courses for students from classes 4-12 and providing additional training for competitive exams such as JEE, NEET, CAT, GMAT, GRE and UPSC exams.
- Many of these courses come with a dedicated tablet which has all the videos covering the necessary topics. In addition, students can also interact with a personal tutor online who is available to clear any doubts the students might have.

# VEDANTU

- **VEDANTU:** Vedantu is another major player in the e-learning sector. The USP of Vedantu is its unique model of having 1-on-1 live student teacher sessions.
- Vedantu offers courses from classes 6-12 for students from CBSE and ICSE.

# COMPARISON BETWEEN BYJUS AND VEDANTU

- Unlike BYJU's which is essentially selling pre-recorded sessions, Vedantu has implemented the entire social structure involving a student and teacher onto their platform by simply putting it online.
- Byjus is good but it's machine learning. Prerecorded video and lectures no human interaction at least not live. Your doubts will be solved but will not be explained.
- But Vedantu provides live learning experienced. In Vedantu sessions are syllabus oriented but also personalized, means your teacher will first ask you first about your requirement, and based on that the teacher will plan the best way to teach you.

Thank  
You
