EDUCATIONAL TRIP TO NASA

The group of 14 students from K.R. Mangalam World School recently visited NASA (National Aeronautics and Space Administration) as part of a special educational trip.

They eagerly shared their packed schedule which had presentations, meeting astronauts where the special mention was about the famous astronaut Winston Scott. Sir Winston Scott shared his space experiences and motivated children to pursue their passions. The clear winner of the mentions was the zero gravity experience which was enriched by gazing at moon rocks and making mini-replicas of the space station's trough.

Students were brimming with stories about astronaut, food and experiencing zero gravity, after the visit to the Kennedy Space Centre at Orlando. Students surely had to do all their tasks in clocked time which added a new attribute to their personalities, thus making them more disciplined!

Visit to the theme based Adventure Parks, Universal Studio followed by the Sea World made children flabbergasted. Special attraction of the sea world was Dolphin theatre, whales show and Penguin's world. These shows definitely left a great impression on the young minds making them realize the importance of sea life and human hands responsibility to preserve them.

Witnessing the amalgamation of nature with artificial lights at Niagara Falls was a treat to eyes that they will clutch in their hearts forever. Exploring a new place had given them a positive reception for their hometown, country and real life.

The school Principal Ms.Priya Arora was pleased to see the students overflowing with supreme fervor and re-energized spirits after their astounding learning voyage. She showed keen interest in organizing more of these trips so as to open the doors of edifying world for her students. In entirety it was a lifetime experience for all!
