

“Mother’s love – a brilliant GEM to be treasured”

Mothers hold a special place in the hearts of children. A mother is one who can take the place of all others but whose place no one else can take.

To pay special gratitude to the unfathomed love of this God’s creation, the students of Pre-primary Jupiter presented a special assembly on “Motherhood” in honour of all the mothers who shower selfless devotion on their children without any expectations. The programme started with a divine welcome dance followed by a skit , through which the tiny tots conveyed their gratitude to their moms for their unconditional love. Keeping this bonding emotion in mind , the students also dedicated a song to show the importance of mother’s contribution in child’s bringing up. Students admired their mothers for the strength and determination that inspires them to pursue a better life. The programme drew to a close with the enthralling and happy mother’s coming up on stage. It was a pleasure watching the super moms with their dynamic children . Given an opportunity to express their feeling of being a lovable mother to their little angels, the affectionate mothers dedicated poems coming straight and deep from their hearts. This made the celebration even more special and left an indubitable mark on the innocent hearts.
