

SPECIAL ASSEMBLY- WINDS OF CHANGE

CLASS X

Change is the only permanent thing in our life, rest everything is transient. This theme was beautifully presented by the students of class X through their class assembly- “Winds Of Change”. The students very poignantly stated certain basic measures which can bring about a considerable change in our environment and lead to the preservation and conservation of our mother Earth. Through a street play they enlightened the students about the ways in which we can reduce the carbon footprint and hence reduce the global warming. They also emphasized the need to use car pools or walk to short distances or use a bicycle instead of cars to travel. Keeping our environment clean with proper segregation and disposal of the garbage is also the responsibility of each and every individual of our nation, which was vividly depicted by the students. The splendid performance of the orchestra enthralled everyone and the deep message enshrined in the play educated and enlightened everyone.
